# Who is a+a training?

a+a training is an international health education company who specialises in providing professional, well organised, client focused training sessions on topics needed when working in the health care industry. a+a training (Australia) is the Australian arm.

Our courses are open to individuals looking for new skills or updating existing qualifications. We also cater for groups, and deliver training on site.

a+a training can provide you with a modern and clinically relevant approach to learning. We provide professional instructors who have excellent teaching skills and most importantly actively work across the health care industry. Our instructors include practicing registered nurses from all areas of health care, midwives, paramedics, general practitioners and emergency physicians.

Call us for your educational needs, we cater for all types of training no matter what needs to be taught.

*First class,  
first choice!*

## IVC & Venepuncture Course

One Day = 8 CNE Points

### What is the IVC & Venepuncture Course:

This course designed to help health care professionals gain the required skills and knowledge to successfully perform intravenous cannulation and take blood samples safely.

### Who is it for:

Ideally suited for beginner health professionals and those who are new to IV cannulation and venepuncture.

### Course Objectives:

- Anatomy and physiology
- Introduction the equipment
- Easy and safe approach to IV cannulation and venepuncture
- Rationale and selecting the correct equipment
- Legal, professional and occupational health and safety responsibilities
- Hints and Tips from health care professionals

## Paediatric Immediate Life Support (PILS)

One Day = 8 CNE Points

This Active Learning Module has been approved by the RACGP QA&CPD Program. TOTAL POINTS: 40 (Category 1)

### What is the Paediatric Immediate Life Support (PILS):

PILS gives health professionals the knowledge and skills required to provide initial treatment to the cardiac arrest paediatric patient. This course is not only about correct CPR technique but also introduces causes and prevention of cardiopulmonary arrest in the paediatric patient.

### Who is it for:

ILS is ideally suited for health care staff exposed to paediatrics. This course is not designed for team leaders of the resuscitation team, but for team members and people exposed to potential paediatric cardiac arrest (ie. nursing staff, paramedics, junior doctors and allied health professionals)

### Course Objectives:

- Update and reflect on Australian Resuscitation Guidelines
- Differences between the adult and paediatric patient
- Causes and prevention of cardiopulmonary arrest in the paediatric patient
- Systematic ABCDE approach to patient assessment
- Basic ECG rhythm recognition and management
- Defibrillation - manual, AED and safety
- Airway management - inc LMA insertion
- Introduction to the first-line drugs
- Initial management of the patient in cardiac arrest until the resuscitation team arrives

**a+a training courses are designed to suit all practicing health professionals including registered / enrolled nurses, medical officers, paramedics, allied health personnel and midwives.**

**a+a training can provide training at your venue or any other suitable location. a+a training are also covered by full public liability insurance and professional indemnity insurance. a+a training prides itself on providing a safe learning environment.**

**If the courses displayed in our brochures do not cater to your needs, please call on **1300 88 47 38** to organise tailor made courses to suit your needs.**

a+a training is endorsed to provide RCNA CNE points Provider No: 07050939
